LED traffic light module with 3x 8mm LED (red, yellow, green), 5V

This traffic light-shaped LED module is ideal for anyone who wants to gain initial experience in controlling LEDs with a developer board such as Raspberry Pi or Arduino. The three 8mm LEDs are individually controllable via pins

Product number	LEDM-TRAF
Weight	0.01kg

Product description

This traffic light-shaped LED module is ideal for anyone who wants to gain initial experience in controlling LEDs with a developer board such as Raspberry Pi or Arduino. The three 8mm LEDs can be controlled individually via pins. The integrated resistors ensure safe operation directly at 5V.

Features:
- Operating voltage: 5V DC
- LED size: 8mm
- LED colours: red, yellow, green
- Dimensions: approx. 56 x 21 x 11mm
- 3mm mounting holes

Product properties

Gross Weight (kg)	0.01
Zolltarifnummer	84733020
Country of Origin	China
Brand	BerryBase
Product ID	LEDM-TRAF
Manufacturer ID	LEDM-TRAF
EAN	4251266702726
